## SKILLS

Java - Intermediate  
Node - Intermediate  
Angular - Intermediate  
PostgreSQL - Intermediate  
Firebase - Intermediate  
Kotlin - Basic  
Git - Intermediate  
Docker - Redis - Jest  
AWS - (Preparing Associate Certification)

## PROJECTS

- Development of an application to control users, entrances and exits for gyms.
- Collaboration in the development of apps released on Play Store with more than 50K users.
- Development of an Angular app for the use of BBDD Firestore.

## LANGUAGES

### English

My experience during ERASMUS in Ireland greatly contributed to improving my English proficiency. Today, after working at **BASF** and **Advance Digital Experts** two German Companies, I am fully comfortable communicating in English.

## HOBBIES

I am passionate about anything that has to do with technology, especially in computer science and electronics. I enjoy tinkering or investigating. You could also call me a gamer since I enjoy playing video games with friends.

## ABOUT ME

I'm a developer graduated as a higher technician in **Cross-Platform App Development**. With a strong passion for technology, I have focused over the past three years to become a proficient **Backend Developer**. Although I specialize in backend technologies, my interest in **Mobile Development** also remains significant. I'm ambitious and love to challenge myself with new goals. My educational background is further complemented by a higher technician qualification in **Electronics and Electricity**, which broadens my expertise in the tech field.

## EXPERIENCE

### Backend Developer & Squad Lead

**ADVANCE DIGITAL EXPERTS**

— May 2022 - Present

I began working on the Cerka application from its early stages, actively contributing to its development until it was ready for users. Throughout this project, I gained experience in various aspects of software development, including microservices architecture and cloud (AWS). After a year of dedicated work, I was promoted to the role of Squad Lead. In this role, I continue to handle backend tasks alongside my additional responsibilities for team management, ensuring the project's continued success.

### Junior Backend Developer

**BASF**

— One Year

Working on Digital Transformation Process Catalysts, Where I have worked on the development of some engineering tools, API Rest in Java with Spring Boot, Lombok... and developing the Front End part with Angular.

Developing Dashboards for Data analysis through Power BI

### Junior Developer (Intership)

**ATOS**

— One Year

Educational formation, knowledge in Android, Java and Angular.

Educational formation in which I did some advanced studies in different programming and framework languages.

Development of an internal application using Google Cloud, Node, Angular, and Botium for tests. I also began studying SISNet.

## EDUCATION

### CFGs Cross-Platform App Development

**CIFP César Manrique**

— 2019 - 2021

### CFGs Electrotechnical and Automated Systems

**CIFP César Manrique**

— 2015 - 2017

My studies were done at CIFP César Manrique from 2015-2017. I was given an ERASMUS + grant, which allowed me to do a traineeship in Cork - Ireland.
